

Cold Chain Packaging Solutions Leader

HELPING TO SAVE MILITARY LIVES

SAVING LIVES ON THE FRONT LINE AND BEYOND

For nearly 20 years, militaries across the world have trusted Peli BioThermal's Golden Hour products to safely, securely and reliably transport blood supplies, tissues, biologics, pharmaceuticals, diagnostics and vaccines to far-forward combat areas away from fixed medical facilities.

Today, Peli BioThermal provides a full line of light weight, durable, rugged packaging solutions designed specifically to transport pharmaceuticals, blood supplies, diagnostics, vaccines and other critical biologics to soldiers enduring the most extreme conditions on the battlefield. Our Golden Hour™ technology provides the longest temperature control duration on the market and has received the Army's Greatest Invention Award in 2003.

Sustainability

Rent. Reuse. Recycle. We're on a journey to protect our environment and our planet one package at a time.

Innovation

Our team thrives in the area between problem and solutions to develop cold chain packaging innovation.

Reliability

Our customers trust us with their most valuable, health-giving and life-saving products.

PELI
BIOThERMAL™

Thermal Packaging Solutions on a Global Scale

Peli BioThermal's innovative single-use and reusable thermal packaging products are used by leading global life science industry companies and organizations in pharmaceuticals, biotech, laboratory, diagnostics, and military/government sectors to protect and safely transport their most critical temperature-sensitive tissues, biologics, diagnostic devices and vaccines. We offer the most diverse and trusted selection of cold chain packaging solutions, worldwide manufacturing and service centers staffed by cold chain engineering experts.

PERFORMANCE YOU CAN DEPEND ON

All Peli BioThermal products are qualified against the highest standards, including the ISTA 7D standard.
